Mnemonic flashcards

27 cut-out cards, one per letter (22 letters and 5 final forms). Front: the letter in print and in Israeli handwriting. Back: a picture to hang the letter on, its shape, its sound, a short story, the look-alike to watch out for, and a pointed anchor word.

1. Print on **A4** paper at **100% / actual size** (turn off "fit to page"). Each card is 2.5 x 3.5 in.
2. Print **double-sided, flip on the LONG edge**. Pages alternate front, back; the backs are mirrored so each back lands behind its front.
3. Cut along the dashed lines (3 x 3 cards per sheet). Use card stock if you can. If your printer is out of register by a few millimetres, trim the cards slightly smaller.
4. Shuffle, look at the front, say the name and the sound, flip to check, and sort the cards you missed into a second pile.

DRAFT: hooks and anchor words not checked by a Hebrew teacher

Pictures: every illustration is still a labelled placeholder (the image run has not happened). The faint outlined letter is real vector type. The memory hooks are teaching aids, not etymology: the letter-name meanings are real Hebrew words, but the claim that each letter was originally a drawing of that object is only a popular story.
