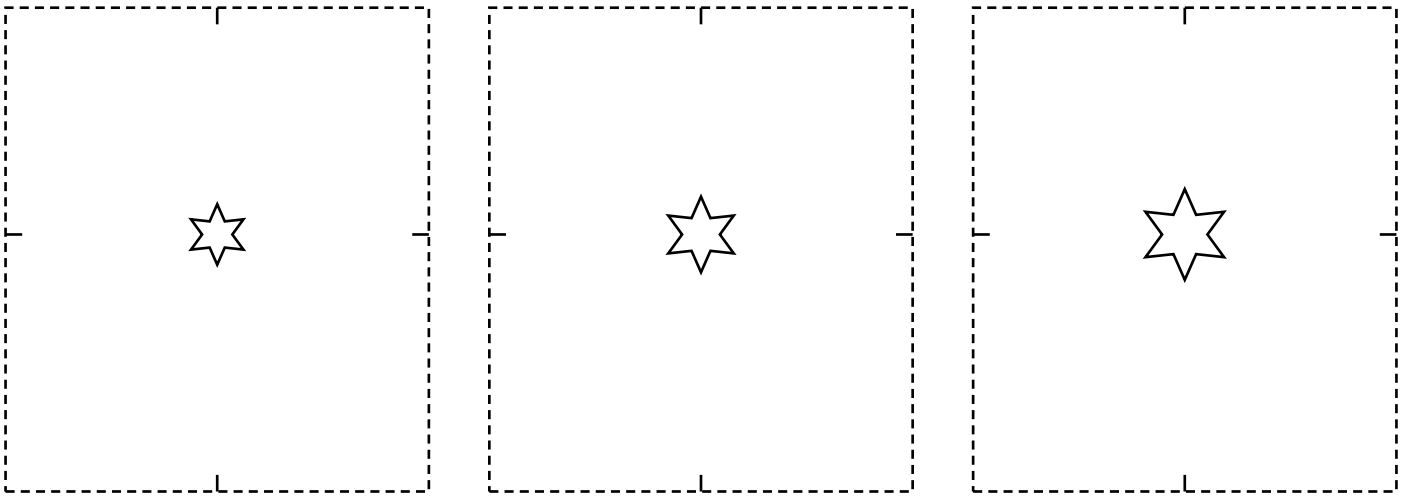
ALEF - Star of David flash stencil

Print at 100% size (actual size). Do not choose Fit to page.
Cut on solid lines. Tape the frame over the rear flash.

20 mm scale - check this is 2 cm after printing



8 mm opening

Cut the star, leave the frame

10 mm opening

Cut the star, leave the frame

12 mm opening

Cut the star, leave the frame

How to use

1. Print this page at 100% (Actual size) on ordinary paper. Confirm the 20 mm scale is truly 2 cm.
2. Choose the opening that matches your phone flash. 8 mm suits a small LED, 10 mm most phones, 12 mm a larger flash.
3. Cut along the solid star outline. Keep the dashed rectangle as a small paper frame.
4. Centre the star over the rear flash (use the tick marks) and tape the frame to the phone. Do not cover cameras or microphones.
5. In a dark room, shine the flash at a wall or ceiling. The star will appear in the beam.
6. This is a stencil for the phone flash only. It is not for use as a flame or with candles.

ALEF - a Hebrew-learning app by John Khan, Toronto, Ontario.
