# Letter flashcards: the memory chain

27 cut-out cards, 12 per page. Each card has a front (the letter and its picture) and a back (the hook word, an example Hebrew word and what it means). Print single-sided at 100% (Actual size) for two piles, or double-sided with a long-edge flip: back pages are already mirrored so each back lines up behind its front.

1. Look at the letter and picture, say its sound, then turn the card to check the hook and the word.
2. Double-bordered cards are the five final forms (sofit), used only at the end of a word.
3. Sort into "know" and "learning" piles.

**DRAFT: pictures, hooks and example words not reviewed by a Hebrew teacher; not tested with learners.**
